Learn how to use MATLAB with the MFSA!

Join us on **Tuesday, November 17** for our MATLAB tutorial!

The session will begin by focusing on the basic skills of using the tool and then become more application-based. The tutorial will be held in MC 4042 at 6:30 PM.

What is MATLAB?

MATLAB is a high-level language and application that is often used for Mathematical and Engineering courses. It is extremely useful to know for MATH 136 and MATH 235, in addition to having wide-ranging applications in mathematics, statistics, and finance.

As always, food and beverages will be provided for everyone who attends the tutorial. Please [RSVP here](#) or stop by our office (MC 3034) to let us know if you can make it (and how much food we should get!).

Date: Tuesday, November 17

Time: 6:30 PM

Place: MC 4042

Regards,

Your MFSA executives
