Spreading the word on the Code in Finance program

As your MFSA executives, we like to help our members stay aware of the opportunities available. Therefore, we have provided some information below on the very beneficial and exciting Code in Finance program.

The [Code in Finance](#) program kicks off this week with sponsorships from firms including **Two Sigma** and **Morgan Stanley**. It helps students interested in quant finance decide which area of the industry is the best fit for their interests and strengths - and then helps you build relevant experience.

Here are the first couple of opportunities they just announced:

- **Omega Point partnership**

If you want to gain access to the kinds of data sources top hedge funds are using - satellite imagery archives, point of sale data, the full Twitter Firehose, just to name a few - you may be interested in learning about [their partnership with Omega Point](#).

20-30 students will have access to the Omega Point platform starting early November.

- **Jobs in Data Science**

Several elite financial firms pioneering the use of data science in fundamental research are looking for young talent. You can learn more [here](#).

If you know someone who might be a good candidate, \$1,000 will be offered for each successful referral to show their appreciation.

To stay tuned as further opportunities become available, please register [here](#).

Regards,

Your MFSA executives
