Learn statistical programming in R with the MFSA!

We're excited to announce our first tutorial coming up this week. On Tuesday, November 10 we'll be hosting our R tutorial! This session will focus more on the basic skills of statistical programming in R and some other cool capabilities of the program that can be easily replicated in other languages.

What is R?

R is a programming language that is often used for non-theoretical STAT courses. It is extremely useful to know and free to download.

As always, food and beverages will be provided for everyone who attends the tutorial. Please **RSVP here** or stop by our office (MC 3034) to let us know if you can make it (and how much food we should get!).

Date: Tuesday, November 10
Time: 6:30 PM
Place: MC 4063

Regards,

Your MFSA executives
